Risks associated with CFDs and FX

What is a derivative financial instrument?

The price of a financial derivative instrument (i.e. option, future, swap, contract for difference) depends on or is derived from the price fluctuations of another underlying asset. A derivative financial instrument can be a transaction at cash without delivery that provides the opportunity to profit from changes in exchange rates, raw materials, stock indices or stock prices. You should not buy a financial derivative instrument unless you are prepared to accept the risks of completely losing all the money you have invested and, similar, of additional commissions and other charges incurred.

What does the abbreviation CFD mean? How is it negotiated?

A CFD stands for Contract for Difference, which is traded on unregulated markets (OTC) and belongs to the class of derivative instruments and allows you to settle the difference between the starting and ending price of an asset without the underlying asset. When you trade CFDs, generally operate with collateral, which means you only have to deposit a small percentage of the overall value of your position. The difference between the value deposited and the overall value of your position is known as leverage. Any CFD position with leverage can be greatly affected in a negative way or positive even for small movements in the market.

If there is a market movement against you, there is a good chance that may suffer a loss greater than the funds deposited in the specific position. You are responsible for all losses on your account up to the total deposited.

How can leverage affect your investment capital?

Leverage is a widely used feature of CFD contracts and FX and may affect you negatively or positively. Any investment traded with Leverage can be significantly riskier than investing in the asset and you should consider whether you can tolerate such risks. The risk or benefit potential comes from the collateral system associated with leverage, which involves a small deposit compared to the actual size of the transaction. The system Margin can have a disproportionate and unpredictable effect on your capital investment, as it can affect you abruptly.

Suitability of contracts for difference for investors CFDs are considered short-term investments and are not suitable for long-term investments term. If you want to hold a position for too long, you should consider Invest in the underlying asset. If you keep a CFD open for a long period of time, there is a greater possibility of sudden market movements than cause a dramatic change in the price of an underlying asset. At all times during which you have open positions, you should ensure that your account complies with the Company's margin requirements to maintain its positions. Must be informed that in case the price moves against him or if the requirements of Company margin have changed, you may be asked to provide funds to us significant additions to meet your short-term collateral requirement for keep your positions open or your positions closed.

Opportunity During the account opening form, the Company evaluates whether the instruments financial and / or products and / or services you chose to operate are appropriate for

you. The Company will have the right to rely on the information that you provide to evaluate the products and services you choose to do business with the Company. If you decide go ahead and open an account with us, you are confirming that you know and understand the risks.

As such, the Company shall have the right to assume that a Professional Client has the experience and knowledge necessary to understand the risks involved in relating to those particular investment services or transactions, or types of transaction or product, for which the Client is classified as a client professional.

Market fluctuations

It is important that you understand the risks associated with trading, as the Fluctuations in the price of the underlying market will influence the profitability of your operational. Slippage occurs when the market suddenly moves in any direction and is the difference between the expected price of a trade and the price at which the operation was actually executed. Then the price is said to 'slid' when the market is split from one level to another due to volatility. This applies in the case of advantageous or disadvantageous price movements and that can lead to losses (negative slippage) or gains (positive slippage).

Risks related to trading CFDs on cryptocurrencies

You must take into account that, for the purposes of Directive 2014/65 / EU (MiFID II), the Cryptocurrencies are not a recognized financial instrument. In contrast, CFDs with cryptocurrencies as an underlying asset are considered a financial instrument that is regulated. Cryptocurrencies as an underlying asset are traded on digital markets decentralized unregulated and, in general, its value is affected by parameters that are outside the scope of the influence of regulatory bodies and are based on internal rules of particular digital negotiation. For this reason, the value of Cryptocurrency is highly volatile and can rise or fall dramatically in a day. When trading CFDs on cryptocurrencies, you should consider the risks involved and that there are numerous parameters that can fluctuate the price of cryptocurrencies and cryptocurrency CFDs.

TradersProFx Ltd derives its market and price data from cryptocurrency CFDs from the decentralized digital markets in which they operate. Before operating, you must consider that, due to the unregulated nature of these markets, TradersProFx Ltd receive market and price information in accordance with rules and practices internal to these markets that are not supervised in a regulated or supervised jurisdiction. This may have an adverse effect on the open positions you have with the Company in cryptocurrency CFDs, which it could lead to a partial or total loss of your investment capital.

Before trading CFDs on Cryptocurrencies, you should consider whether you can tolerate risk significantly greater loss to your investment capital than can occur in a short period of time as a result of sudden adverse price movements of

Cryptocurrencies.

Risks associated with cash stocks Before trading stocks spot, consider what, since positions are not are leveraged, your deposited margin has a lower risk compared to CFDs on shares, as fluctuations in the value of the underlying asset have a minor impact on your investment capital. Despite the above, your investment capital may be at risk due to factors such as market volatility, changes regulations or during periods when companies publish quarterly reports or annually, the value of the shares you own could increase or decrease dramatically resulting in the partial or total loss of your investment.

Shares are bought and sold on stock exchanges around the world, therefore, its value may fluctuate based on factors that sometimes cannot be identified or approach. Before trading, you acknowledge that the value of the shares is outside the sphere of influence of TradersProFx Ltd and that, due to the complexity of its assessment, TradersProFx Ltd will not be able to stipulate specific reasons as to how the value was affected of your investment. Also, you need to be extremely cautious when trading stocks. related to companies in emerging markets, smaller companies or startups, as there is a greater risk of losing your invested capital and / or it may be more difficult to buy or sell stocks in such markets. when you own Cash Shares, you are entitled to a dividend payment of action if the Company declares such dividends. However, there are specific cases of jurisdiction in which your profit may be influenced by tax regulations applicable. In cases where taxes are owed and TradersProFx Ltd has an obligation If such taxes are withheld from your investment, the applicable tax will be withheld at consequence, and the overall return on your investment could be influenced. Notwithstanding the foregoing, you should carefully consider your investment objectives, level of experience and risk tolerance before trading individual stocks. Should fully understand and acknowledge the risks and obligations involved in such investment. Your investment in individual stocks could have a positive or negative on your investment capital, regardless of any performance past performance of an action that is not indicative or that guarantees future results. Risks associated with portfolio management (copy / social trading) TradersProFx Ltd offers portfolio management and social trading services. By taking the decision to follow a specific trader and / or a particular strategy, you must consider your entire financial situation, including financial commitments, and You understand that copy trading is highly speculative and you may suffer loss and damage from all your capital invested. You agree to take full responsibility for your choice of strategy and / or trader and acknowledge that TradersProFx Ltd has not made or will not specific recommendations on which you have the right to select. The risks associated with Copy Trading are, among others, the automated execution of trades by which the opening and closing of operations will be carried out on your account without your manual intervention.

The Company provides copy trading services for informational purposes only. TradersProFx Ltd and its affiliates, agents, directors or employees are not responsible for any damage that may be caused by comments or statements of the advisors of

JFD. You are solely and exclusively responsible for the risk of your investment decisions and any reliance on the information that is available on the website of the Company or as a result of the use of operations copy functions does not impose no responsibility regarding the integrity and correctness of the content presented to the Company.

In addition, any information and / or other aspect related to the Trades copy features provided through the website of the Company should not be construed as investment, tax or other advice related financial information. You should not consider such content and / or appearance as professional financial and / or investment advice. Consequently, you must seek, as appropriate, relevant independent professional advice on the investment considered. If you choose to participate in such activities and / or transactions related to the Company's copy service, such decision and any result resulting from this transaction will remain your sole and exclusive responsibility. FxWinning Ltd, its affiliates, agents, directors, employees do not provide investment advice direct, indirect, implicit or in any other way. Not you should make any investment decisions without doing your own research independent and without determining if there is any investment, strategy or other service is suitable for you based on your personal investment goals and situation financial The returns obtained in the past should be considered as results of hypothetical performance. The actual percentage of profit / loss experienced by traders varies based on many factors, including but not limited to deposits, withdrawals, Account conditions / settings, market behavior and the trader. In any case, no representation or warranty is made that any account will achieve or are likely to make gains or losses as the previous performance of a strategy.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY LIMITATIONS INHERENT. NO REPRESENTATION IS MADE THAT ANY ACCOUNT WILL OR LIKELY BE ABLE TO EARN PROFITS OR LOSSES SIMILAR TO THOSE THAT ARE PUBLISHED. THERE ARE NOTABLE DIFFERENCES BETWEEN THE RESULTS OF HYPOTHETICAL PERFORMANCES AND THE ACTUAL RESULTS THAT ARE LATER CAN BE OBTAINED BY ANY PARTICULAR BUSINESS PROFILE. ONE OF THE LIMITATIONS OF THE RESULTS OF HYPOTHETICAL RETURNS IS THAT THEY ARE IN GENERAL OBTAINED ON THE HISTORICAL PROFIT. BESIDES, THE HYPOTHETICAL TRADING DOES NOT INCLUDE FINANCIAL RISK, AND NO RECORD OF HYPOTHETICAL NEGOTIATION MAY TAKE INTO ACCOUNT THE IMPACT OF RISK FINANCIAL TRADING IN REAL. FOR EXAMPLE, THE CAPACITY OF BEARING LOSSES OR ADHERING TO A PARTICULAR BUSINESS PROFILE INSTEAD OF TRADING LOSSES ARE MATERIAL POINTS THAT THEY MAY ALSO ADVERSELY AFFECT THE RESULTS OF THE TRADING IN REAL. THERE ARE NUMEROUS FACTORS RELATED TO THE MARKETS IN GENERAL OR WITH THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROFILE THAT IS NOT IT CAN BE FULLY TAKEN INTO ACCOUNT AT THE TIME OF PREPARING HYPOTHETICAL PERFORMANCE RESULTS AND EVERYTHING THAT MAY AFFECT ADVERSELY TO TRADING RESULTS.

Risk warning:

You must recognize that CFDs are complex instruments and carry a high risk of lose money quickly due to leverage. 84.25% of the accounts Retail investors lose money when trading CFDs. You should consider if you understand how CFDs work and whether you can afford to take the high risk of losing your money.
